PRESS

" There must be something on the air, or in it, to explain the space rock blooming in central Texas. This Austin sextet expands on the arc-riff grandeur of local travelers Explosions in the Sky with John Cale-like viola and simple, rising melodies that take you way up and out. My surprise find at SXSW this year, My Education are advanced ecstasy.
- Rolling Stone Magazine, David Fricke

" This is post rock tastic bringing together elements of Mogwai, Godspeed, Explosions and all the other post rock supergroups and making one album of lovelyness. And it's all very good I tell you...."
- Norman Records

" With moments of walls of sound, aggressive post-rock, melancholy sections, and patience, My Education brings to the table a formidable piece of beauty and chaos that should be in everyone's CD library. "
- Somewhere Cold

" Fans of Young Team-era Mogwai and Godspeed You Black Emperor! but who long for a band who make instrumental music without wandering off into the realms of unnecessary weirdness will revel in this album. "
